Maya Chen

Computing Science student | Python, APIs and applied AI

Application focus: Graduate AI Engineer

SUMMARY

- Third-year Computing Science student with project evidence in Python APIs and applied AI.

EXPERIENCE

- Answered customer questions, collaborated with a small retail team and followed written procedures during busy periods.

SELECTED PROJECTS

- Contributed Python service logic, SQL queries, REST endpoint design, validation and unit tests to a team course-planning API.
- Created a tool-call agent prototype that selected local course tools and recorded each tool result before responding.

TECHNICAL SKILLS

- Python, Java, SQL, REST APIs, Git, GitHub, pytest and Jupyter Notebook.

Prepared from confirmed profile information.
