Liam Patel

Computing Science student | Retrieval, NLP and model evaluation

Application focus: AI Engineer - RAG and agents

SUMMARY

- Computing Science student focused on NLP, retrieval and practical LLM applications.

SELECTED PROJECTS

- Built a retrieval-augmented assistant over local job descriptions, compared prompts, inspected evidence and documented uncertainty.
- Prepared a labelled text dataset, trained a baseline classifier and compared precision and recall across two settings.

TECHNICAL SKILLS

- Python, pandas, NumPy, scikit-learn, PyTorch basics, SQL, Hugging Face Transformers basics, Git and Jupyter Notebook.

Prepared from confirmed profile information.
